Career Summary

“Solution driven individual with 5 years of professional experience in building responsive and cross-browser compatible captive portals for major hospitality chains and independent brands.

An analytical problem solver skilled at adapting to new information.

With strong foundation in customer service, the importance of a job well done is well understood.”

Professional Experience

Kunda House

Birmingham, B7 4BB, United Kingdom

Front End Developer

Jan 2024 to Present

- Lead the development and integration of new features and content for our in-house website, ensuring seamless functionality and user experience.
- Collaborate directly with the founder to evaluate and implement innovative solutions and improvements.
- Work closely with the design team to enhance the visual appeal and user interface of web pages.
- Partner with backend and AI teams to ensure efficient data flow and feature implementation.
- Oversee the deployment pipeline, managing processes from local development to staging and production environments.

Intertouch Business Solutions Inc.

BGC, Taguig City

Senior Web Design and Development Associate

Oct 2019 to January 2023

- Transformed web design drafts into functional API-integrated websites for Cloud-based captive portals, ensuring cross-browser compatibility and responsive design across both web and mobile platforms.
- Managed multilingual content translation, customized, and updated existing website designs and features to meet client specifications.
- Collaborated with QA to collect website request or issue data for handover to the backend development team.
- Guided and supported the web design and graphics team to ensure their queries and deliverables met established standards.
- Spearheaded enhancements within release cycles to optimize efficiency for the timely delivery of short and long-term goals.

Web Design Associate

Apr 2018 to Oct 2019

- Transformed web design mockups into a functional website based on a default template layout, serving as a captive portal for hospitality clients.
- Oversaw content translation for multiple languages, tailored, and enhanced existing website designs and functionalities in accordance with client requirements.
- Implemented script injection using JavaScript, enabling greater flexibility and customization in site designs.

Technical Support Representative

Dec 2015 to Apr 2018

- Handled inbound calls and responded to emails, aiding users in connecting to the site network.
- Developed a variety of JavaScript bookmarklets to streamline data collection and simplify URL access into a one-click process.
- Handpicked as an ad hoc programmer under the Training Department to develop a troubleshooting tool with automated documentation using VB.NET and MySQL.

Concentrix (formerly Convergys Philippines)

Shaw Blvd., Mandaluyong City

Technical Support Professional for QuickBooks

Sep 2014 to Mar 2015
